1. The Amendment filed on 07/20/2007 has been entered. Claims 1-27 are pending in this Office action.

Response to Arguments

2. Applicant's arguments, see Applicants' Remarks, filed on 07/20/2007, with respect to claims 1-27 have been fully considered and are persuasive. The rejection of claims 1-27 has been withdrawn.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

3. The present invention is directed to a radio reception apparatus compatible with a plurality of modulation methods having different multi-value numbers. Each independent claim identifies a combination of the uniquely distinct features "measuring unit measuring an error vector corresponding to a distance between an original symbol point of a received signal and an actually received symbol point on an IQ coordinate plane" and "a comparing unit comparing said measured error vector with a prescribed threshold value". The closest prior art of record, Yoshida U.S. Patent 6,452,964 B1 disclosing "adaptive modulation method", either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
